259 South Beach Road, Jupiter Island Spectacular New Look for Jupiter Island Oceanfront Home

Recent renovations have added even more elegance and beauty to this magnificent Jupiter Island estate home that boasts fabulous views of the Atlantic Ocean and a very private location encircled by exquisite natural landscaping. With over 6,680+/- total square feet, 5 bedrooms, and 7.5 baths, the two-story residence showcases an outstanding array of artistic appointments that graciously blends *Old World* and contemporary detailing. Among the many highlights are: 'Smart House' wiring that offers the ultimate in convenience, and a private 2-bedroom, 2-bath guest suite with sitting room and breakfast kitchen. Outdoors, relax around a lovely free form swimming pool framed by a border of swaying palms.

Innovative Design and Details: Step through the home's impressive double door entry into a European-inspired foyer that presents sensational ocean views straight ahead through the living room's curved wall of French doors. A formal dining room flanks one side of the foyer, while steps lead down in to private 2-bedroom guest suite on the other. Just beyond is a secluded den. Illuminated by natural light, the thoughtfully designed interior portrays a casually elegant ambiance enhanced with beautiful kale stone floors and wide mouldings. The living room's inviting relaxed feel is an invitation to sit and savor lush outdoor views, or to step out onto the covered terrace.

Together, the designer kitchen and family room create a wonderful area for getting together with family and friends. The Tuscan-inspired kitchen's richly detailed custom cabinetry provides ample storage, while serving as an attractive surface for the double refrigerators and dishwashers. State-of-the-art appliances include Subzero and Wolf. A wine cooler, center island, granite countertops, a breakfast room, and French doors complete the kitchen's gourmet appeal.

The second floor offers two guest suites, an exercise room, and a private master suite that has been remodeled to perfection. The master suite's sitting area is ideally situated to capture panoramic ocean views, complemented by a wide balcony for even better views. His and her walk-in closets are equipped with cabinetry. Gleaming honey and onyx tilework adorns the master bath's floor, accented by marble topped vanites and a decorative mirror.

The home also includes central vacuum, impact resistant windows, a 3-car garage with storage, and a back-up generator.

Scenic Outdoor Recreation: Oceanside, the home's wide wraparound covered terrace captures cool sea breezes and features a summer kitchen. Step down to an oasis-like swimming pool setting, where tall palms and lush vegetation create a tranquil haven. Winding across the broad green lawn, a walkway leads to a terraced sitting area poised just above the beautiful pristine beach.
